Google Apps Deployment

Your successful deployment depends on uninterrupted email flow, zero-loss data migration, mobile device and systems integration, and managing expectations. We offer a range of deployment services to match your needs, augment your skills, and meet your budget.

Planning & Leadership

Cumulus Global will assess technical requirements and draft a comprehensive deployment plan. We can guide or lead your deployment project team.

Configuration & Training

We don't just install Google Apps! We adapt our **best-practice configuration** settings to your needs and priorities. If desired, we offer **Active Directory and LDAP integration** and **single sign-on** solutions. Before we finish, we ensure that your IT team has a basic understanding of the **Google Apps Admin Console** and any third party applications included in your deployment

Data Migration

Zero Disruption, Zero Data Loss. Cumulus Global has the expertise, methods, and tool set necessary to ensure your data moves into Google Apps smoothly and efficiently. Beyond email, contacts, and calendar, we **move file systems into Google Drive**, preserving folder hierarchies and last modified dates.

Change Management

Your successful deployment depends on how well your employees adapt to changes in how they work. Cumulus Global **helps you promote and communicate.** We offer an array of **Training, Education, and Support** services during and after deployment.

Value-Add Service Options

Custom Migration Services:

- Hosted / POP3 services
- Non-standard email servers/services
- FirstClass Migrations
- Off-Site Migrations

Google Guides Program:

- We train and support your early adopters
- Guides help promote Google Apps and provide peer support during and after deployment.

Multiple Service Levels:

- Fast Track: Our expertise; Your Hands.
- Admin: Your IT team and Google Guides get expertise guidance and support – without limit.
- Premium: Add "Tier 2" end user support to your Admin services.

Cumulus Global helps small and mid-size organizations thrive by delivering pragmatic and secure cloud computing solutions. We align technology with our clients' goals, objectives, and bottom lines, and leverage our expertise, vendor relationships, and a diversified range of best-of-breed cloud services to create custom solutions with tangible value.
